eSM+eFLS3-LF6-PT1-CU2 EU (1:5)

This 3D isometric illustration shows the eSM+eFLS3-LF6-PT1-CU2 EU assembly. It consists of a main rectangular base unit with a hinged front door, a top-mounted square panel, and a control interface on the left side featuring a black knob, a black button, and a blue indicator light. A thick black cable is connected to the top of the unit, looping around and connecting to a long, narrow rectangular module. This module is further connected to a smaller, box-like component at the end. A second, thinner black cable with a standard three-prong electrical plug is also connected to the side of the main unit.
